Projects

Mkhdom

Mar 2025

This project is a comprehensive remote services platform designed to facilitate seamless access to high-quality service content across various sectors, including education, marketing, government, and banking. The platform is built using PHP (Laravel) and consists of a website, a client app, and a service provider app, ensuring a smooth and efficient experience for both users and service providers.

Arkanseifiya

Jun 2025

online platform specializing in event and festival management as well as online ticket booking and sales.

Work Experience

Backend Developer

Nov 2024 - Present

Al Almiya Alhura | Egypt

As a Laravel & PHP Developer at Al Almiya Alhura, I'm responsible for designing, developing, and maintaining scalable web applications and mobile backend services. Working on high-performance, secure, and feature-rich solutions that cater to a large user base. My role involves collaborating with cross-functional teams, optimizing database structures, and implementing best practices for performance and security.

- Develop and maintain scalable Laravel web applications and mobile backend APIs.
- Optimize application performance for high traffic and large data processing.
- Implement best practices for security, caching, and database optimization.
- Integrate third-party services, APIs, and payment gateways.
- Collaborate with frontend and mobile app developers for seamless integration.
- Troubleshoot, debug, and enhance existing systems.
- Deploy and manage applications on cloud platforms.

Backend Developer

Jan 2024 - Aug 2024

ITAD VIP | Saudi Arabia

- Worked with a team on 3 large logistical projects aimed at linking orders to a captain in the easiest possible way and including the companies that make orders and the companies that appoint captain's in order to facilitate and provide the largest amount of daily orders for the captain and raise the captain's cost to the restaurant or company that publishes the orders.

Backend Developer

Mar 2023 - Dec 2023

Technomasr For Web Solutions | Egypt

Worked in an Agile team of developers in Software house Company Setting Products using PHP and Laravel MVC and MYSQL Database Front End (React) Mobile (Flutter and Firebase).

- Worked with a team on developing and creating websites such as CRM, ERB, E-commerce, web app and mobile app solutions.
